IN REPLY REFER TO:

2540

Gentlemen:

The Emergency Broadcast System (EBS) has become the Nation's principal means for communication with our citizens in times of emergency. Developed by the Federal Communications Commission in consultation with industry representatives, EBS has been highly successful because of the voluntary participation of the large majority of broadcasters throughout the United States.

As Defense Commissioner, one of my major responsibilities is to oversee the preparation of emergency plans such as the EBS. I would like to personally invite your station to become a participant.

The FCC is cooperating with the Federal Emergency Management Agency (FEMA), the National Weather Service (NWS), and the National Industry Advisory Committee (NIAC), which is composed of private industry communications personnel, to encourage use of the EBS for day-to-day emergencies. Reports we have received from stations using the EBS during local emergencies such as tornadoes, flash floods, nuclear power plant and industrial accidents have documented the effectiveness of the system to alert the public quickly and efficiently.

As you may be aware, EBS provides facilities for the President and the federal government, as well as heads of state and local governments, or their designated representatives, with a means of communicating with the American public during emergency situations. Your participation in EBS can contribute greatly to insuring the effectiveness and successful operation of the system.

Enclosed is an EBS Authorization which the FCC has issued to your station; if you wish to participate in the EBS, please retain the Authorization and contact the Emergency Communications Division (202-634-1600) FCC, Washington, D.C. 20554 for EBS materials. If not, simply return the authorization to that office.

Your cooperation is greatly appreciated.

Sincerely,

Mimi Weyforth Dawson
Defense Commissioner

Enclosure

EMERGENCY BROADCAST SYSTEM AUTHORIZATION

Under Section 2.407 of the Commission's Rules, the Broadcast Station described below may be used and operated for the purpose of participating in the Emergency Broadcast System during an Emergency Action Condition, in accordance with the requirements hereinafter set forth, and Subpart G of Part 73 of the Commission's Rules.

Conditions of operation: All operation under this authority shall be in accordance with the terms and conditions of the current normal license of the station, or as specifically provided in the Detailed State Emergency Broadcast System (EBS) Operational Plan.

Licensed operator requirements: The licensed operator requirements applicable to operation of the station under its regular station license shall apply to operation under this authorization.

Term of authorization: This authorization may be changed or cancelled by the Commission at any time without the necessity of a hearing if in the judgment of the Commission such change or cancellation is necessary.

Expiration date: The authority herein granted shall expire with the expiration of the current normal license of the station. Unless surrendered by the holder or suspended, modified, or withdrawn by the Commission, this authorization shall have continuing and renewed effect under succeeding license renewals.

Effective date:
